Post options for Coronado & Bellevue mailboxes

Our Basic Post is a 3" round galvanized steel tube that provides for in-ground mounting. It is fully powder coated and comes with all mounting hardware and installation instructions. Available in Black, Bronze and Sand.

Designed as an enhancement for the Basic Post, this post set includes the 3" round Basic Post and a decorative base cover. The base cover is a cast aluminum fluted base that conceals unsightly concrete work allowing for a clean installation. Available in Black or Bronze.

Simple, clean and elegant, the Standard post is a 4" square galvanized steel pole. It is available in both surface mount (5526) or in-ground mount (5525). All mounting hardware is included along with installation instructions. The Standard Post is fully powdered coated and is available in all matching mailbox colors.

Our Decorative post is a classic design The post is fully powder coated extruded aluminum and the finial and support arm are fully powder coated cast aluminum. The support arm is configured to cantilever the mailbox forward. The Decorative Post is available in all mailbox colors.

The award-winning Grande Post adds style and elegance to any mailbox installation. Our single piece steel post construction provides extra rigidity and strength. Available in top mount or side arm shown. The moveable support arm provides versatility in mailbox height. The cast aluminum base cover conceals mounting hardware. Powder coated to match our post mount mailboxes, the Grande Post's modular design allows for fast assembly and easy part replacement.
